EXPLANATORY NOTES TO THE FINANCIAL STATEMENTS

For the Accounting Period from January 1, 2026, to March 30, 2026

(These notes are an integral part of the financial statements and must be read in conjunction with them.)

1. Business Activities Overview

Ownership Structure

Constrexim Investment and Construction Joint Stock Company No. 8, established via the equitization of a state-owned enterprise under Decision No. 2261/QĐ-BXD dated December 8, 2005, issued by the Minister of Construction. The company operates under Business Registration Certificate No. 0103010381, issued by the Hanoi Department of Planning and Investment on December 21, 2005, with the latest amendment on July 18, 2008.

According to Business Registration Certificate No. 0103010381 issued by the Hanoi Department of Planning and Investment, the company's charter capital is 26.721.570.000 VND .

Headquarters: Constrexim 8 Building - Nguyễn Trãi - C7 - Thanh Xuân - Hanoi.

Business Activities

According to Business Registration Certificate No. 0103010381 issued by the Hanoi Department of Planning and Investment, the company's business activities include:

Construction and installation of civil, industrial, transportation, irrigation works, infrastructure engineering projects, electrical lines and transformer stations, mechanical and refrigeration systems, as well as interior and exterior decoration of buildings; real estate investment, brokerage services, leasing, and consulting; construction consulting and inspection of construction projects (excluding design services); production and trading of construction materials, cargo transportation, and passenger transport services; trading and import/export of materials, machinery, technological lines, and goods; investment trust activities domestically and internationally; management, operation, and business services for high-rise residential and office buildings; real estate business; production and trade of concrete structures; infrastructure and technical facility development in urban areas, industrial parks, export processing zones, high-tech parks, and new economic zones; leasing of offices and residential properties; afforestation and mineral exploitation (excluding minerals prohibited by the State).

2. ACCOUNTING POLICIES AND PRACTICES APPLIED AT THE COMPANY

Fiscal Year and Currency Used in Accounting

The company's fiscal year begins on January 1 and ends on December 31 annually.
The currency used for accounting records is the Vietnamese Dong (VND).

Accounting Standards and Policies Applied

Accounting Policies Applied

The company applies the Corporate Accounting Policies issued under Decision No. 15/2006/QĐ-BTC dated March 20, 2006, by the Minister of Finance and Circular No. 99/2025/TT-BTC dated October 27, 2026, by the Ministry of Finance.

Declaration of Compliance with Accounting Standards and Policies

The company has adopted Vietnamese Accounting Standards and guidance documents issued by the government. Financial statements are prepared and presented in full compliance with the requirements of each standard, guiding circular, and the currently applied accounting policies.

Form of Accounting Applied

The company employs computerized accounting systems.

Principles for Recognizing Cash and Cash Equivalents

Economic transactions conducted in foreign currencies are converted into Vietnamese Dong (VND) at the actual exchange rate on the transaction date. At the end of the fiscal year, monetary items denominated in foreign currencies are converted using the interbank average exchange rate announced by the State Bank of Vietnam on the last day of the accounting period.

Exchange rate differences arising during the period and those resulting from the revaluation of balances of monetary items at year-end are handled in accordance with Circular No. 201/2009/TT-BTC dated October 15, 2009, which provides guidelines for managing exchange rate differences in enterprises.

Short-term investments with a maturity of no more than three months that can be readily converted into cash with minimal risk of value fluctuation are classified as cash equivalents as of the reporting date.

Inventory Recognition Principles

Inventory is recorded at cost. If the net realizable value is lower than the cost, it must be recorded at the net realizable value. The cost of inventory includes purchase costs, processing costs, and other directly attributable costs incurred to bring the inventory to its current location and condition.

Inventory is accounted for using the periodic inventory system.

Inventory is accounted for using the periodic inventory system.

Provisions for inventory write-downs are made at year-end and represent the difference between the cost of inventory and its net realizable value.

Recognition and Depreciation of Fixed Assets

Tangible fixed assets and intangible fixed assets are recorded at cost. During their usage, tangible and intangible fixed assets are recognized based on their original cost, accumulated depreciation, and remaining value.

Finance leased fixed assets are recognized at cost, which is the fair value or the present value of the minimum lease payments (excluding VAT) and any directly related initial costs associated with the finance lease. During usage, finance leased fixed assets are recorded at cost, accumulated depreciation, and remaining value.

Depreciation is calculated using the straight-line method. The Company determines the depreciation period based on the remaining useful life of the asset, estimated as follows:

- Buildings and structures	25 years
- Machinery and equipment	06 - 08 years
- Transportation vehicles	06 - 08 years
- Office equipment	03 years

Recognition of Financial Investments

Investments in subsidiaries and associates are accounted for using the cost method. The net profit distributed by subsidiaries and associates, which is earned after the date of investment, is recognized in the Income Statement. Other distributions (aside from net profit) are considered as recoveries of the investment and are recorded as a reduction of the investment's original cost.

Investments in joint ventures are accounted for using the cost method. The joint venture contribution is not adjusted for changes in the Company's share of the net assets of the joint venture. The Company's Income Statement reflects income from the distribution of the accumulated net profit of the joint venture, which is earned after the investment has been made.

The Company applies the same accounting principles as for ordinary business operations to joint venture activities under joint control and co-owned assets. Specifically:

- The Company separately tracks income and expenses related to joint venture operations and allocates them to the joint venture parties according to the joint venture agreement;
- The Company separately tracks its joint venture capital contribution, its share in co-owned assets, and any joint or separate liabilities arising from joint venture activities.

Investment securities at the reporting date are classified as follows:

- Securities with a redemption or maturity period not exceeding 3 months from the purchase date are considered "cash equivalents";
- Securities with a redemption period of less than 1 year or within 1 operating cycle are classified as short-term assets;
- Securities with a redemption period longer than 1 year or beyond 1 operating cycle are classified as long-term assets;

Provision for Investment Write-Down is made at year-end and represents the difference between the book value of investments recorded in the general ledger and their market value at the time the provision is made.

Recognition and Capitalization of Borrowing Costs

Borrowing costs are recognized as an expense in the period in which they are incurred, except for borrowing costs directly attributable to the acquisition, construction, or production of qualifying assets, which are capitalized into the value of the asset (capitalized). This is in accordance with the requirements outlined in the Vietnam Accounting Standard No. 16 "Borrowing Costs."

Borrowing costs directly related to the acquisition, construction, or production of qualifying assets are capitalized and included in the value of the asset. These costs include interest on loans, amortization of discounts or premiums on bond issuance, and any other costs incurred in relation to the loan processing.

Recognition and Allocation of Prepaid Expenses

Prepaid expenses that relate to the current fiscal year's production and business activities are recognized as short-term prepaid expenses and are expensed in the current fiscal year.

The following expenses, incurred during the fiscal year but recorded as long-term prepaid expenses, are allocated over multiple years into the business results:

- Formation costs;
- Pre-operation costs / production preparation costs (including training expenses);
- Relocation costs, restructuring costs;
- Large start-up or trial production costs;
- High-value tools and equipment issued for use;
- Foreign exchange losses incurred during the basic construction investment phase;
- Major repairs to fixed assets that are unusually large.

The calculation and allocation of long-term prepaid expenses into production and business expenses for each accounting period are based on the nature and extent of each type of expense, selecting an appropriate allocation method and criteria. Prepaid expenses are gradually allocated into production and business expenses using the straight-line method.

Recognition of Accrued Expenses

Accrued expenses are costs that have not yet been incurred but are recognized in advance as production and business expenses in the period. This is done to ensure that the actual costs do not cause a sudden increase in production and business expenses, in accordance with the matching principle between revenue and expenses. When these expenses are incurred, if there is any difference between the actual amount and the amount that was accrued, the accountant will make the necessary adjustments by either adding or reducing the expense to reflect the difference.

Recognition and Method of Accounting for Provisions

The recognized value of a provision is the most reasonable estimated amount of money that will be required to settle the current liability at the end of the fiscal year or at the end of the interim fiscal year.

Only expenses related to the initially established provision can be offset by the corresponding provision.

The difference between the provision recognized in the previous fiscal year, which has not been fully used, and the provision recognized in the current reporting period is reversed and recorded as a reduction in production and business expenses for the period. However, any excess difference in the provision for construction warranty provisions is reversed into other income for the period.

Recognition of Owner's Equity

Owner's equity is recognized based on the actual capital contributed by the owners.

Share premium is recognized as the difference between the actual issuance price and the par value of shares when shares are first issued, issued as additional shares, or reissued from treasury shares.

Other capital contributions by owners are recognized at the remaining value of assets received by the company as gifts from other organizations or individuals, after deducting any taxes payable (if any) related to the gifted assets, and do not include reinvested business earnings from operations.

Treasury shares are shares issued by the company and later repurchased. Treasury shares are recognized at their actual value and are presented in the Balance Sheet as a reduction in equity.

Dividends payable to shareholders are recognized as a liability in the company's Balance Sheet once the dividend declaration is made by the Board of Directors.

Undistributed after-tax profit represents the profit from the company's operations after deducting adjustments for retrospective changes in accounting policies and adjustments for prior period material errors.

Recognition of Revenue

Revenue from Construction Contracts

Revenue from construction contracts is recognized using the percentage of completion method, with the results of the contract being reliably determined and confirmed by the customer. The results of the contract are considered reliably estimated when the following four conditions outlined in Accounting Standard No. 15 "Construction Contracts" are met.

Revenue from Sales of Goods

Revenue from the sale of goods is recognized when all of the following conditions are met:

- The majority of risks and rewards related to ownership of the product or goods have been transferred to the buyer.;
- The company no longer retains control over the goods as if it were the owner or has no power to control the goods;
- The revenue can be reliably measured;
- The company has received or will receive economic benefits from the sale transaction;
- The costs related to the sale transaction can be reliably determined.

Revenue from Service Contracts

Revenue from service contracts is recognized when the results of the transaction can be reliably determined. In cases where the service provision spans multiple periods, revenue is recognized in the period based on the work completed as of the balance sheet date. The results of the service provision transaction are considered determined when the following conditions are met:

- The revenue can be reliably measured;
 - There is a likelihood of receiving economic benefits from the service transaction;
 - The portion of work completed as of the balance sheet date can be determined;
 - The costs incurred for the transaction and the costs to complete the service provision can be determined
- The portion of work completed in providing the service is determined using the method of assessing the work completed.

Financial Revenue

Revenue arising from interest, royalties, dividends, profit distributions, and other financial income is recognized when both of the following conditions are met:

- There is a likelihood of receiving economic benefits from the transaction;
- The revenue can be reliably measured.

Dividends and profit distributions are recognized when the company has the right to receive the dividend or profit from its investments.

Recognition of Financial Costs

Financial costs recognized include:

- Expenses or losses related to financial investment activities;
- Borrowing costs and interest expenses;
- Exchange rate losses from foreign currency transactions;
- Provisions for the impairment of investment securities.

These costs are recognized in their total amounts for the period and are not offset against financial revenue.

Recognition of Current and Deferred Corporate Income Tax Expenses

Corporate income tax reflects the total value of current taxes payable and deferred taxes.

Current corporate income tax expense is determined based on taxable income and the applicable corporate income tax rate for the current year.

Deferred corporate income tax expense is determined based on temporary differences that are deductible, taxable temporary differences, and the corporate income tax rate.

The determination of the company's income tax is based on the current tax regulations. However, these regulations may change over time, and the final determination of corporate income tax depends on the results of audits conducted by the competent tax authorities.

(These explanatory notes form an integral component of the financial statements and must be read in conjunction with them)

The company's tax settlement will be subject to inspection by the tax authorities. Due to the application of tax laws and regulations to various types of transactions, which may be interpreted in different ways, the taxes presented in the financial statements may be adjusted based on the tax authorities' decisions.

OTHER INFORMATIONS

Comparative information

The comparative figures are the amounts on the Balance Sheet of the financial statements for the fiscal year ending on December 31, 2025. Some items have been reclassified for comparison in accordance with Circular 99/2025/TT-BTC dated October 27, 2025, which provides guidance on the amendments and supplements to the corporate accounting system. The Income Statement and Cash Flow Statement do not include comparative figures.
